CRIME STOP SYSTEMS.com

➔ **PBM "Pain"-Ball Machine**

Automatic paint ball or pepperball response machine that delivers 50 rounds in 5 secs, then re-sets. Triggers all alarms but responds to intruders immediately and automatically. Can be monitored from your smart phone.

About the PBM "Pain"-ball machine:

➔ **Automatically delivers** up to 50 rounds of paintball or other missiles in five second bursts, aimed where the PIR eye has picked up movement. The PBM automatically tracks its barrel to spray missiles in a short arc at 25m. The missile hopper holds between 200 and 1000 rounds. Firing is automatic. Detection range up to 50M.

➔ **Features:** Siren alarm. Battery charger. Remote set-up and firing options. Manual override. Pet friendly settings. Can link to other existing alarm systems.

Locate your PBM strategically in access paths and zones or vulnerable "Corridors". Intruders usually elect the easiest way to enter and leave. PBM machine has anti-tamper features. PBM is easily relocatable. Back-up power is provided and solar charging can also be fitted for security during periods of power outages.

➔ **Additional options:**

Automatic dial-up features.

Link to base alarm monitoring.

Solar back-up to make your system independent of Eskom uncertainties. Camera options, voice activation and other smart phone monitoring features also available.

➔ **Recommended uses:**

External entry areas around your home or factory. Within factories or store areas. Roof access areas. Office areas protecting computer rooms and other valuable assets. Farms and small-holdings protecting your family and your home, storage areas, machinery and animals. Pumps, transformers, switchboards and cable locations.
